Thanks to the
40th
anniversary

Shikotsu Toya National Park is the first Geopark recognized by UNESCO in Japan. The historic geological environment and the gorgeous natural environment will definitely accelerate your heart beats.

Toya Caldera and Usu Volcano Global Geopark

Lake Toya was formed by an extremely large-scale eruption occurred 110,000 years ago. On the other hand, Mt. Usu was formed by repeating gigantic eruption occurred in between 10,000 and 20,000 years ago. As Mt. Usu area has abundant water and food resources, we can see lots of historical remains of the "Jomon culture" and the "Ainu People". Today, we are still receiving the grace of the Mt. Usu volcano as we can enjoy hot springs, delicious food and beautiful scenery.
